

Dear William, Betsy & Mark:

Today, I had a conversations with Fritjof Capra (author Tao of the Universe) and Lynn McTaggart (author The Field) in regards to a very special event to take place the end of November that I truly believe would be quite beneficial in the promotion of your film. But, more importantly, could help to promote the message in your movie that “there's a big connection between what you think inside your mind and what's happening outside.”

Let me share with you that a month ago we planned this event when Fritjof Capra agreed to participate and then he made recommendations of other notable individuals to join him, some of which are in your movie.

The purpose of this event could very well be one of the most historical events in the endeavor of melding quantum physics and metaphysical thinking and to explore a methodology that addresses precisely “how can people rewire their synapses to perceive a better world around them?”

You can only imagine my pure delight and joy this week when I experienced your movie in my hometown in Albany, NY. I was strongly compelled to contact you immediately because you may be ideal participants to be included in this rare event. Not to mention, the tremendous value it could add to all parties concerned and the world.

I would like to explore the possibility of your participation in this event that will comprise of only 15-20 of the most highly respected individuals from the fields of science, physics and systems thinking. Bringing together this unique and powerful group of individuals could begin to make a major impact towards the purpose of truly beginning to understand reality both through science and spirit.

My goal is to arrange a time when we can speak further and begin exploring the possibility if this is a good fit for all of us. My associates and I will be on the west coast the middle of next week with various meetings in supporting this event. It would be quite wonderful if there's an opening for us to meet, even if for 30 minutes. I assure you, it will be quite worth it.

In closing, when I read William's quote: "I guess I'll find out soon whether I'm a visionary, or just have a VERY expensive hobby"...my thoughts were.....I believe he and all of you are visionaries and you will have profound effects in the world for generations to come.

I look forward with optimism to a future meeting with all of you. Please feel free to contact me via my cell phone at 518-424-8333 anytime day or evening, including weekends or via my email at [Barbara@barbarabouchey.com](mailto:Barbara@barbarabouchey.com).

With great respect,  
Barbara Bouchey
