Exam:

EOE: (X)WNL ( )Findings:

Hard Tissue Exam: (X)WNL ( )Findings: Soft Tissue

Exam: (x)WNL ( )Findings:

TMJ exam: (X)WNL ( )Findings: Periodontal

exam: (X)WNL ( )Findings:

Occlusion:

(X)Class I ( )Class II ( )Class III

( )crowding ( )open bite ( )crossbite ( )other

( )mesial step ( )distal step ( )flush terminal plane

overbite % overjet mm

( )ortho referral to

Habits:  thumbsucking  pacifier  tongue thrust

Oral hygiene:  good  fair  poor

Plaque  light  moderate  heavy

Calculus  light  moderate  heavy

Stain  light  moderate  heavy

Recommend:  supervised brushing  supervised flossing

decrease cariogenic diet

RX Fluoride:  Yes  No

Prevident  Gel Cam

Caries risk assessment:  High  Moderate  Low

Diagnosis:  dental caries  gingivitis

Discussed diet recommendations, oral hygiene instructions given.

Anticipatory guidance provided.

Recommendations by Dr: extraction of B, I, J, restorations on A, K, L, S and T

Treatment plan proposed:  SDF  crowns  composite  nitrous oxide sedation

extractions

space maintainers  active surveillance

Discussed with mother option of referral to oral surgeon for extractions if child is anxious, also discussed obtaining a second opinion to restore B, I and J with pulpotomy and crowns

#### Frankel Score

F4 child is completely cooperative and even enjoys the experience

F3 child is cooperative but reluctant, needs behavior management

F2 child is uncooperative, very reluctant to listen/respond to instructions

F1 child is completely uncooperative, crying, very difficult to make any treatment

pre-cooperative
